

Coating Options

DuPont™ Teflon® PTFE (polytetrafluoroethylene)

- Black color
- One coat process
- Formulated with special blends of fluoroplastics and other high-performance resins to improve toughness and abrasion resistance
- Excellent corrosion resistance and good dry lubrication properties
- Resins provide adhesion and abrasion resistance
- Low friction, nonstick characteristics
- No VOC emissions.

DuPont™ Tefzel® ETFE (ethylene/tetrafluoroethylene)

- Two coat process (primer and topcoat)
- Dark green color
- Excellent chemical resistance
- The toughest of the fluoroplastics
(a copolymer of ethylene and tetrafluoroethylene)
- Abrasion-resistant
- Applied through a spray-and-bake procedure in multiple coats, with each coat sprayed and baked individually.
- Perfect for applications in harsh chemical environments.
- High temperature resistance (150°C)
